DT4UA
EU SUPPORT FOR DIGITAL TRANSFORMATION OF UKRAINE

What?

Being a part of a large-scale European Union assistance, the DT4UA project supports the digital transformation of Ukraine. DT4UA contributes to the development of e-governance in Ukraine, strengthening the efficient and secure provision of public services for citizens and businesses.

DT4UA continues the work of the EU4DigitalUA project and helps Ukraine to improve digital infrastructure and public e-services in accordance with EU standards. Thanks to the project, millions of Ukrainians suffering from the war will be able to interact with the state safely and effectively, receiving important public services, both inside and outside Ukraine.

At the same time, sustainable digital transformation and new digital services will contribute to faster restoration of everyday life and business after the end of war.

Who?

Funded by the **European Union**

Implemented by the **e-Governance Academy** (eGA, Estonia) in close collaboration with the **Ministry of Digital Transformation of Ukraine**

How much?

17.4 mln EUR

When?

November 2022 - April 2025

"Our duty is to help ensure continuous development of digital services in Ukraine. These services, necessary during the war, remain relevant during the recovery process. That is why the European Union supports Ukraine in improving the provision of digital services and e-government"

AMBASSADOR MATTI MAASIKAS

Head of the Representation of the European Union in Ukraine

Key project priorities:

- Sustainable development of public e-services and ecosystem for their provision
- Improvement of data exchange between registers and state institutions
- Approximation of Ukrainian electronic identification infrastructure to EU standards
- Empowerment of criminal cases processing through e-Case management system

Expected results:

- Number of e-services for citizens and business is increased.
- State institutions have improved capacity to quickly develop and deliver hi-quality e-services.
- 'Vulyk' information system has been modernized and used in Diia centers (Administrative Service Centers), enhancing citizens' access to public services.
- Trembita data exchange system is updated, while the quality and security of critical state registers is improved.
- Technical prerequisites are created for EU states to recognize Ukrainian digital identity and signature.
- E-Case management system is launched and enables the efficient and transparent processing of criminal cases, including war crimes.
